

# SPRING THING 2015

PRESENTED BY

## Bonneville Chapter ICC

Instructor

**Todd Snider, P.E., S.E.**  
with Kimball Engineering

This seminar will dissect the requirements of Chapter 17 of the IBC. A detailed discussion will be provided for each designated special inspection, structural testing and structural observation item listed in the building code. Project scenarios will be provided and a roundtable discussion will be had as to what inspection and testing items would be required for each example. A substantial amount of time will be used to discuss what qualifications are necessary for special inspectors, testing agencies and structural observers. Several handouts will be provided to each attendee that will help in developing a "model program" within your own jurisdiction in relation to special inspections.

### Location

Farmington Community Arts Center  
120 South Main Street Farmington, Utah 84025

### Date

April 14, 2015
