## COURSE DESCRIPTIONS:

**2018 IBC Requirements for Fire stopping & Firestop Inspection 8:00am-12:00pm. Half day class.**

### INSTRUCTOR:

Patrick Tesche

The seminar will provide an understanding of the various listed penetration and joint systems to be reviewed, explain the ASTM methodology for sampling and visual and destructive testing, and best practices of Firestop Inspection and Quality Control. Special focus will be provided on 2018 IBC Section 1705.17 Fire Resistive Penetrations and Joints.

**2018 ATC-20 Rapid Visual Assessment of Structures, 8:00am-4:00pm 8:00 am- 4:00 pm. Full Day**

### INSTRUCTOR:

Bob Carey, John Crofts

The seminar will provide ATC-20 training and updates to be utilized for the rapid visual assessment of structures after a catastrophic event. The training will include placarding requirements as well as a field survey component to assist in identifying potential failure of Structures due to seismic, flooding or wind events. This seminar will fill the Certification training requirements for the USAP program of the Utah Seismic Safety Commission (USSC).
